

# Package: pkgbump (via r-universe)

September 10, 2024

**Title** Increment version numbers in package files

**Version** 0.0.3

**Description** Increment package version numbers in the R Description file, package.json, and any use\_\* files located in the R directory. The primary function `update\_pkg\_version` is currently suited for Shiny package development, but will be updated in the future.

**License** MIT + file LICENSE

**Encoding** UTF-8

**LazyData** true

**Roxygen** list(markdown = TRUE)

**RoxygenNote** 7.1.1

**Imports** cli (>= 2.1.0), jsonlite (>= 1.7.1), stringr (>= 1.4.0)

**Repository** <https://davidruvolo51.r-universe.dev>

pkgbump	<i>Update Package Version Number</i>
---------	--------------------------------------

---

**Description**

Auto-increment package version number for across tracked package files. This was originally intended to update version numbers in the DESCRIPTION, package.json, and use\_\*.R files. Use the function set\_pkgbump to define which files should be managed by pkgbump.

**Usage**

```
pkgbump(version)
```

**Arguments**

version            version number to write

**Value**

Update package version number in tracked files

**Examples**

```
## Not run:  
  pkgbump(version = "1.0.0")  
  
## End(Not run)
```

---

set_pkgbump	<i>Set Package Files to Manage</i>
-------------	------------------------------------

---

**Description**

Use this function to define the files that should be incremented. Use the argument patterns to define custom search patterns. Files that are supported by this package are .json, .R, and R package files (i.e., DESCRIPTION).

**Usage**

```
set_pkgbump(files, r_patterns = NULL)
```

**Arguments**

files            an array of full file paths  
r\_patterns      a string containing search patterns for R files (optional)

**Examples**

```
## Not run:  
set_pkgbump(files = c("package.json", "DESCRIPTION"))  
  
## End(Not run)
```
